

Rabbi Elliot Dorff

Ancient Wisdom for Today's Life and Death Decisions

The incredible medical breakthroughs of today, like genetic engineering, in-vitro fertilization, and cloning along with the possibilities for euthanasia and organ donations have transformed long-held beliefs on the nature of both life and death. They raise difficult moral and religious questions.

Rabbi Elliot Dorff, named by Newsweek as one of "the 50 most influential rabbis in America" is chairman of the Rabbinical Assembly's Committee on Jewish Law and Standards. He has written many opinion papers and legal rulings on significant aspects of Jewish law and philosophy. He served on the ethics committee of Hillary Rodham Clinton's Health Care Task Force, and is a member of the Ethics Advisory Committee for the state of California on stem cell research.

Choose this dinner and join Rabbi Elliot Dorff as he shows us how Jewish law and ethics can be the basis for resolving medical dilemmas.
